

CODE REVIEW

PROJECT NAME : **FOOD DELIVERY SYSTEM**

AUTHOR : **GIRIVASAN**

REVIEWER : **VASHANTH TS**

1. Maintained Proper Folder structure , Naming Conventions and Code Quality .
2. Proper line break could have been maintained **@BillServiceImpl (if , else)**
3. It could be good if there is a line spacing between every method declaration in **Service Interfaces** as it improves readability .
4. Avoid Using **@Autowired** instead use Constructor Injection in Controller classes.
5. String Values need not to be in Camel Cases (**"deleteFailure", "updateSuccess"** etc ..in Customer Controller)
