Errors

1. In the StudentController class, instead of using a wildcard (*) in the @CrossOrigin annotation, you can explicitly define the allowed origins.
2. In the StudentController class, you are mentioning   e.printStackTrace() in the catch block of the updateStudent() and deleteStudentById() methods, which is unnecessary
3. In the StudentServiceImpl class, the getStudent() method does not utilize Optional or isEmpty to verify the existence of the ID
4. In StudentsbRestApplnApplicationTests class, the contextLoads method should not be empty. which is located inside the src/test/java folder,
